

GAM Risk Scale

Gemini Risk Scale

Lower Risk ← → Higher Risk

Objective

The portfolio is part of a range of ten multi-asset portfolios. The portfolio aims to provide capital growth in line with its risk profile over a period of 5 years or more by investing in a diverse portfolio of active and passive funds. The Fund's risk profile is rated as 8 where 1 is a lower level of risk and 10 is a higher level of risk.

Description

A portfolio for this risk profile is most likely to contain mainly high- and very-high-risk investments, such as UK, overseas developed and emerging market shares. It is also expected to have a small amount of medium-risk investments such as Property as well as Sterling corporate bonds and global bonds including higher income types. Always check that you are comfortable with the investments that are included in your chosen portfolio. The Gemini Asset Management Ltd (GAM) risk level 8 portfolio invests across a range of asset classes to create a diversified portfolio and thus spread investment risk. There may be occasions when an asset class is not present in the portfolio due to current market thinking. Funds for each asset class are carefully selected utilising extensive quantitative and qualitative analysis and are reviewed on an ongoing basis. A typical Risk 8 portfolio would consist of approximately 20 funds at any one time. Passive investment strategies are considered together with actively managed funds.

Key Information

Inception Date	16/03/2017
Number of Funds	23
Strategy	Active
Recommended Minimum Investment Period	5-Years
Ongoing Charge Fee (OCF)	0.65%
Discretionary Management Charge	0.24%
Comparator	IA Mixed Investment 40-85% Shares

Comparator Description

Investment Association (IA) pool together similar funds based on their holdings and create 'sectors' - these sectors essentially act as peer groups for funds. Using the IA Mixed-Investment sector allows us to make comparisons between Gemini Asset Management's portfolios against a peer group with similar equity exposures.

The portfolios equity content may differ from its comparator.

Asset Allocation

Portfolio Date: 30/09/2024

	%
● Equity	94.2

● Brazil	2.7
● Australia	2.3

The above shows the weighting held in different regions and countries around the world. The proportions in the above table show the percentage each region or country holds within the equity bucket of the portfolio, rather than the total asset weight to the region or country.

Please note performance shown is based purely on investment performance. They do not take into account any applicable platform or advice charges, which will reduce the figures accordingly. The above is representative of a portfolio held on the Quilter platform only - other providers' portfolios may vary.

5-Year Investment Growth

Time Period: 01/10/2019 to 30/09/2024

Discrete Performance (%)

01/10/2019 - 30/09/2020	01/10/2020 - 30/09/2021	01/10/2021 - 30/09/2022	01/10/2022 - 30/09/2023	01/10/2023 - 30/09/2024
7.53	18.30	-18.60	6.40	14.94

Cumulative Performance (%)

3 Months	6 Months	1 Year	3 Years	5 Years
1.57	3.96	14.94	-0.45	26.63

Source: Morningstar Direct - total return, bid-to-bid. Past performance is not a guide to future performance. The Gemini Asset Management risk level 7 is a multi asset portfolio and therefore the comparison with the IA sector and indices shown in the chart are offered as a guide only.

Portfolio Journey

This chart shows the calendar year returns of the GAM 7 portfolio, only including the fund charges. Return is shown as a percentage.

5-Year Drawdown

Maximum drawdown refers to the largest percentage decline in the value of an investment portfolio from its peak value to its lowest point, over a specific time period - here the period is 5 years.

Return Distribution

Time Period: 01/10/2019 to 30/09/2024

The return distribution above shows how many times a given return has been generated by the portfolio in the last 5 years. It counts the number of months that the portfolio produced a specific return. The return is shown on the horizontal axis, and the count for the number of periods (in months) is shown on the vertical axis.

Please note: past performance is not a guide to future performance. The value of investments can fall as well as rise and you may not get back the amount originally invested. Figures correct as of 31/03/2022
